POLISH ARMAMENTS GROUP

The LZS-12,7 and LZS-12,7 WLKM gun pods are integral systems for suspending on typical pylons of aircraft and helicopters (with fixing system of NATO standard and former Warsaw Pact e.g. BD3-55M). The gun pods can be armed with a 12,7 mm heavy machine gun WKM-Bm or 12,7 mm multi-barrel machine gun WLKM-Bm fed by ammunition 12,7 x 99 mm of NATO standard. The gun pod is reusable weapon system suspended on the outer racks and rigidly connected with the helicopter or aircraft.

Main characteristics:

- high accuracy and efficiency due to automatization of firing
- it can be mounted on different types of aircraft and helicopters
- it is possible to fire with series of programmed length
- outside ejecting of the cartridge cases and links
- calculation of remaining ammunition.

Technical data	LZS-12,7	LZS-12,7 WLKM
Weapon	WKM-Bm	WLKM
Ammunition	12,7 x 99 mm	12,7 x 99 mm
Dimensions (length/width/high in mm)	2515/555/545	2515/555/545
Weight (kg)	170	190
Ammunition volume	250 cartridges	320 cartridges
Feeding/reloading	electric/pneumatic	electric/pneumatic
