The .308 ZMT HS bolt-action sniper rifle is fed by a .308 Winchester ammunition and it's a special construction for civilian market. This rifle model is designed for hunters and sport shooters specializing in precision shooting for large distances. .308 ZMT HS is equipped with a Picatinny rail, which allows various bipod mount possibility. It is produced in several buttstock solutions, optionally may also be equipped with a muzzle device. The rifle meets all the requirements related to the usage of weapons on Polish and European civilian market.

Main characteristics:

- user-friendly rifle
- high efficiency of firing (high accuracy)
- low recoil force (because of muzzle brake)
- free-floating barrel
- small weapon length (bull-pup system)
- high manoeuvrability (low weight, size, centre of gravity located above the pistol grip)
- trigger mechanism with very high reliability (low inertia of firing mechanism components).
