PGZ

The WKW TOR-12.7 bolt-action anti-materiel rifle is fed by a 12.7 x 99mm NATO (.50 BMG). The rifle is designated for precise annihilation of major military equipment of an enemy (specialized technical equipment, command posts, communications equipment, fuel and propellant tanks, radar and transponders equipment). The weapon accurately disables enemy combat equipment within a 2000 m distance. The WKW TOR-12.7 rifle can also be used for counter sniper tactics that aim to eliminate the threat caused by an enemy sniper and especially in military operations other than war.
