60 mm Commando mortar LM-60K

The light mortar LM-60K 60 mm Commando can be used against enemy manpower and enemy's military devices located on counter slopes, ravines and behind terrain covers. It may be also used to destroy the observation and command posts as well as light fortifications during day and night, in all weather conditions. It is a typical weapon of special forces, mountain infantry, airmobile troops, landing troops, reconnaissance forces and military police.

The light mortar LM-60K Commando is a development of mortar LM-60D construction. It was designed on demand of special reconnaissance troops. Due to high fire efficiency, great range and accuracy, small weight and high manoeuvrability the light mortar LM-60K provides effective support in all conditions, especially during the battle in urban area and uneven terrain. Steep round track and small size of the mortar in combat position allow to place it in deep cover which makes it difficult for detection. In mortar gravitational sight and bolt are mounted. The sight allows flat track firing at the distance up to 1300 m and the bolt allows firing at fixed or moving firing pin.

Main characteristics:

- very small dimensions
- high accuracy
- possibility of flat track shooting using firing mechanism
- great range
- low weight
- high manoeuvrability
- high efficiency of fire
- user-friendly weapon.

Technical data:

Calibre (mm)	60
Range (m)	67 - 1300
Rate of fire (rds./min.)	25
Weight (kg)	25
Number of operators	1 (2)
Work mode	single-shot
